

2011 ACADEMIC PROGRAM/LOW COMPLETER REVIEW

Louisiana Board of Regents

I. PURPOSE

The Board of Regents sees academic program review as both its core mission and the best way to approach efficiency, streamline delivery, and achieve an overall re-balancing of the postsecondary system. Though statewide reviews of the curriculum inventory are historically conducted every 5-10 years, the Regents find it both desirable and necessary to conduct a review of low producing academic programs again, this time including both productivity and duplication in the evaluation of existing programs to make determinations about program viability and continuation. The assessment, analysis, and outcomes that result will contribute to making higher education more efficient, sustainable, and valuable to the State of Louisiana and its citizenry.

II. IDENTIFICATION OF LOW COMPLETER PROGRAMS

No degree program area is automatically excluded from this review, nor will requests for continuation be considered lightly.

Based on the specified three-year average completers, 459 programs were originally identified (out of a total of 1,555) for review; however, institutions have until Friday, 4 February, to contact the Associate Commissioner for Academic Affairs with any corrections to the data (e.g., approval dates, name changes) that might remove a program from the Program Review List. As of 27 January, there are now 439 programs on the list for review.

III. TIMELINE

28 February	System/Campus responses due to BoR staff (see Section IV. Process)
28 February – 18 April	Staff evaluates responses and follows up with systems/campuses as deemed necessary
27 April	Final report and recommendations to the Regents

Campus responses, submitted through the system office, are due to the Associate Commissioner for Academic Affairs by **Monday, February 28, 2011**. Electronic submissions are preferred. Although the length of a response will naturally vary based on complexity of the program and the proposed course of action, a response for each program under review should be possible within three or fewer pages.
