

University of Louisiana at Monroe

Executive Summary for 2014-15

OPENING STATEMENT

The University of Louisiana at Monroe (ULM) will use the WISE funds allocated to it during 2014-2015 and the associated private matching funds to increase the number of students enrolled in (in the short term) and the number of completers from (in the long term) selected programs. These programs have been identified as having gaps between the annual job demand and the number of degree completers, so increases in the workforce will benefit the state's economy. The degree programs being targeted are the BBA and the PBC in Accounting, the BBA and the PBC in Computer Information Systems, the BS in Computer Science, the BSCM in Construction Management, the BS in Dental Hygiene, and the BS in Medical Laboratory Sciences.

These goals will be achieved by improving student access to increase enrollment, enhancing student support for better retention and additional completers, expanding and modernizing classroom and laboratory equipment and information technology to improve student learning and throughput, and hiring and retaining faculty to teach the additional students so that more completers are produced.

WISE STRATEGIC PRIORITIES

1. STUDENT ACCESS

- a. Reach additional students by developing online courses
- b. Increase enrollment in IT programs by offering a summer cybersecurity camp
- c. Increase enrollment by offering internships and need-based scholarships

2. STUDENT SUPPORT

a. Improve student retention with a summer mathematics boot camp

3. CLASSROOM AND LABORATORY EQUIPMENT/IT

- a. Increase enrollment by expanding classroom and laboratory equipment and information technology
- b. Increase student retention by modernizing classroom/laboratory equipment and information technology

4. FACULTY AND FACULTY RETENTION

- a. Increase the number of completers by hiring professionals-in-residence to teach
- b. Increase the number of completers by hiring faculty to champion and teach in online programs
- c. Increase the number of completers by providing faculty with a market adjustment to improve retention

Personnel: Funds will be used to hire part-time professionals-in-residence who will bring their workforce experience into the classroom and help teach additional students in the information technology programs and construction management. A full-time faculty member in accounting will be hired to champion the online PBC program and teach classes for the additional students. One faculty member in business, who teaches across several disciplines, will receive a market salary adjustment to help retain him. Salaries will be paid to faculty for developing and teaching both the summer cybersecurity camp and the mathematics boot camp, both of which will be targeted to low- and middle-income (LMI) students.

Scholarships: Need-based scholarships will be provided for LMI students majoring in the targeted programs at ULM. A portion of the funds will be directed to LMI transfer students so that completers may increase as soon as possible. Internships will be provided to qualified students, regardless of income status.

Equipment: Classrooms used by the targeted programs will be equipped with "smart" technology (i.e., interactive whiteboards and computer monitors, projectors, screens, computers, document cameras, and speakers) to modernize the student learning environment. Computer laboratories used by the information technology programs will have additional computers installed and older models will be replaced with state-of-the-art systems. Equipment used in the dental hygiene clinic will be upgraded to better serve the students and to accommodate more students.

Supplies: Supplies will be provided for the cybersecurity camp and the mathematics boot camp. Additional supplies will be purchased to accommodate an expanded enrollment in medical laboratory sciences courses.

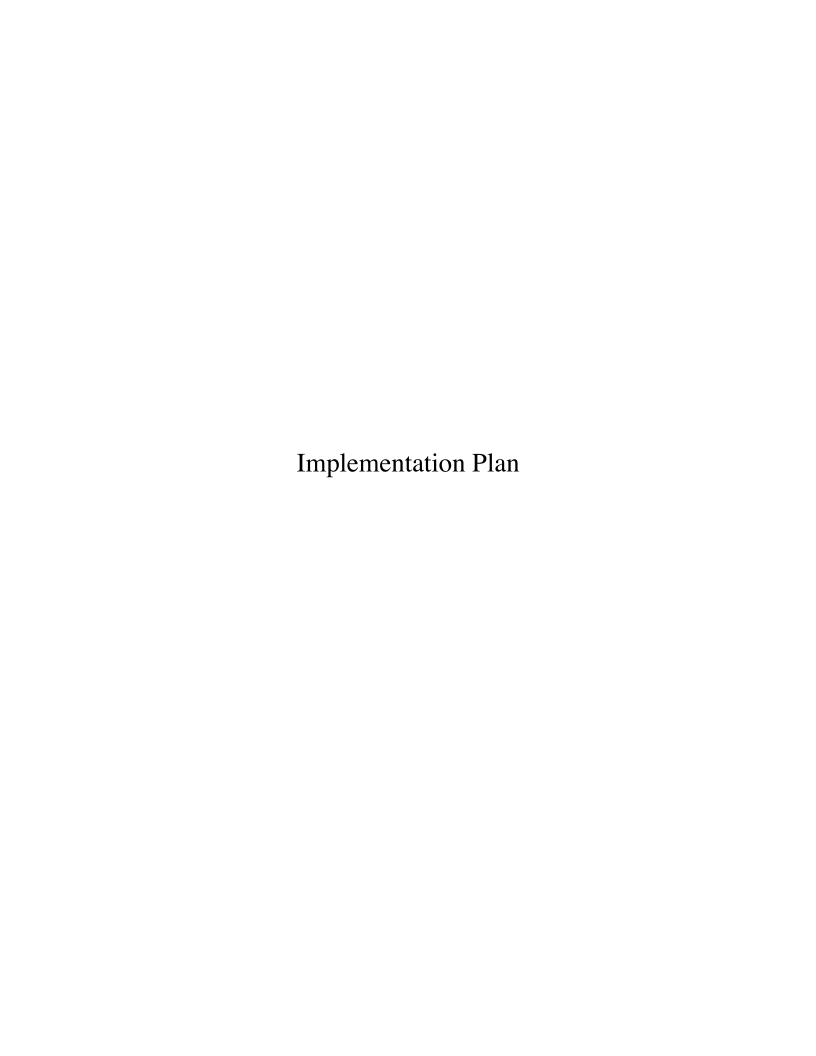

Other: Funds will be used for a professional services contract with a company that, in collaboration with ULM faculty, will develop online courses for the PBCs in Accounting and Computer Information Systems and the BSCM in Construction Management. Similarly, a company experienced in marketing online programs will be employed to help boost enrollment in these programs. Stipends will be paid to LMI students participating in the cybersecurity camp and the mathematics boot camp to replace often-critical income they would have earned while working during the summer.

WISE Implementation Plan 2014-2015 University of Louisiana at Monroe

The University of Louisiana at Monroe (ULM) will use the WISE funds allocated to it during 2014-2015 and the associated private matching funds to increase the number of students enrolled in (in the short term) and the number of completers from (in the long term) selected programs. The degree programs being targeted are the BBA and the PBC in Accounting, the BBA and the PBC in Computer Information Systems, the BS in Computer Science, the BSCM in Construction Management, the BS in Dental Hygiene, and the BS in Medical Laboratory Sciences.

Program: Online program development and marketing

Funds will be used for a professional services contract with a company that, in collaboration with ULM faculty, will develop online courses for the PBCs and the BSCM. Similarly, a company experienced in marketing online programs will be employed to help boost enrollment in these programs.

Date: October 20, 2014

| Degree/Certificate Level | Title of Program | Description | CIP Code |
|--------------------------|------------------|-------------|----------|
| Bachelor | BBA and PBC | Accounting | 52.0301 |

High-priority field: Yes (Tier 1)

Planned actions:

- Develop and teach online courses so that the PBC degree requirements can be completed completely online
- Market the online PBC program throughout the state
- Provide need-based scholarships for low- and moderate-income students in the programs
- Provide internships for qualified students in the programs
- Develop and conduct a summer mathematics boot camp to help prepare incoming freshmen for the face-to-face program
- Modernize classrooms with "smart" instructional technology including projectors, whiteboards, computers, document cameras, screens, and controllers
- Hire one tenured professor to oversee the online PBC and assist with teaching traditional
 courses; minimum credentials would include a terminal degree in accounting or a related field
 along with appropriate academic experience and scholarship commensurate with the rank of
 professor; anticipated costs are \$158,700 for salary and related benefits
- Provide a market salary adjustment to retain one tenure-track faculty member; anticipated costs are \$13,800 for salary and related benefits

Delivery method: Traditional for the BBA; online for the PBC

Narrative

- Online program development and marketing: Online course development costs will be paid in Year 1. Marketing of the online programs is an annual cost. An annual adjustment is made for estimated increases in costs.
- <u>Scholarships and internships</u>: Need-based scholarships are an annual cost and are based on a 70% 1st-to-2nd year retention rate, an 80% 2nd-to-3rd year retention rate, 100% retention rate from then until graduation in year 6. A 10% annual increase is assumed per student to account for annual tuition increases.
- <u>Summer programs</u>: The mathematics boot camp and the cyber security boot camp are annual expenditures. A 10% annual increase is included.
- <u>Equipment and supplies</u>: Instructional technology is reduced from Year 1 to Year 2 to allow only for classroom upgrades to smart technology. A 10% annual increase is included in out years. Dental hygiene equipment is needed only in Year 1. Supplies for the medical laboratory science courses are an annual expenditure. A 10% annual increase is included.
- <u>Faculty and faculty retention</u>: The two instructor-level professionals-in-residence, the tenured accounting professor, and the one market adjustment are annual expenditures. A 3% annual increase is included.
